## EDUCATION

Oklahoma State University

Bachelor of Science in Computer Science

August 2022

---

## EXPERIENCE

Oklahoma State University

Paraprofessional/Computer Operator

March 2021- May 2023

- Deployed and configured 300+ computers across the campus network.
- Resolved technical issues for over 1000+ users both onsite and remotely.
- Manage and document tickets highlighting troubleshooting steps, system information, and account credentials.
- Assisted users with account management, software installations, and network connectivity.
- Setup classroom and office technology including printers, projectors, TV's and other systems.
- Diagnosed and repaired laptops, including hardware swaps and software reinstallation.
- Collaborated with technical teams to improve system performance around campus.
- Improve

---

## PROJECTS

Developed Web Developer Portfolio

November 2024

- Built a responsive multi-page web portfolio using React, Node.js, and Sass with smooth animations.
- Integrated React Router DOM for dynamic navigation between pages.
- Implemented a secure contact form using Formik, Yup and reCAPTCHA for validation.
- Focused on delivering a minimalist design that provides a seamless user experience.

Puzzle Application (Swift)

April 2022

- Developed a functional tile puzzle game using Xcode and Swift
- Designed and implemented complex game logic to scramble and solve the puzzle.
- Applied algorithmic thinking to improve logic accuracy.

---
